Cap - widely recycled

Bottle made from at least 30% recycled plastic

Helps acid loving plants thrive

Ideal for Rhododendrons,
Azaleas & Camellias

For healthy plants &
abundant flowering

Rich green foliage,
stops leaves yellowing

Longer-lasting, bigger
blooms of vivid flowers

1 Litre

Vitax Ericaceous Feed is a concentrated feed with
chelated iron and manganese to encourage strong,
healthy growth and promote flowering of acid loving
plants including Azalea, Camellia and Rhododendron.

INSTRUCTIONS FOR USE

Apply at weekly intervals during the spring and summer to moistened
soil around the base of plants or as a foliar spray in the early evening
or during dull days.

APPLICATION

Using watering can and rose:

1 capful = 20 ml. Mix 1 capful in 6 litres of water and apply to
the base of the plant to thoroughly soak the roots.
Apply the feed every two weeks from March to September.

As a foliar spray

Mix 1 capful in 6 litres and spray on a dull day or in the evenings.
Do not spray directly onto flowers. Repeat at weekly intervals.

Caution

Wash hands after use and wash splashes
from skin. We recommend using gloves
when gardening.
Avoid over watering or allowing plants to dry
out as this can cause damage to the roots.
Do not keep diluted feed.
Keep out of the reach of children. Store out
of direct sunlight, in a cool dry place
between 0°C and 30°C.
Children and pets may be allowed on to
treated areas after applying the feed.
